## Section 1 Rules and other Governing Provisions

Item	Explanation
1	<p style="text-align: center;"><b>Participating Carriers</b></p> <p>The list of carriers participating in this Tariff is as shown in the following publication, supplements thereto or reissues thereof:</p> <p>Participating Carrier and Scope of Operating Rights Tariff 10-G, MF-Ill.C.C. 287, issued by Illinois Movers Tariff Bureau, Inc., Agent.</p>
2	<p style="text-align: center;"><b>Statement as to General Purpose of the Mileage Guide</b></p> <p>Every reasonable effort has been employed to develop mileages between all points in Illinois. Mileages are computed as air miles, not road miles. Considering that more than one desirable route may be used between points, the main objective of this mileage guide is to establish a uniform basis of mileage computation.</p>

## Section 1 - Rules and Other Governing Publications

Item	Explanation																
3	<p><b><u>How to Calculate Mileages</u></b></p> <ol style="list-style-type: none"> <li>1. Look up each point (city, town, village, etc.) in Section 3. They will be listed alphabetically.</li> <li>2. Each point will show a row number and a column number.</li> <li>3. Subtract the origin point's row number from the destination point row number. (Subtract the lower number from the higher number. It doesn't matter if the difference is a negative number; we're only concerned with the number.)</li> <li>4. Subtract the origin point's column number from the destination point's column number. (Subtract the lower number from the higher number. It doesn't matter if the difference is a negative number; we're only concerned with the number.)</li> <li>5. Refer to the mileage table "grid" (see page 4). The point on the grid where the calculated row and column numbers intersect is the distance "mileage."</li> <li>6. All distances are based on air miles, not actual road miles.</li> </ol> <p style="text-align: center;"><b>EXAMPLE:</b></p> <table border="1" style="margin-left: auto; margin-right: auto; border-collapse: collapse; text-align: center;"> <thead> <tr> <th colspan="2"></th> <th>ROW</th> <th>COLUMN</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">ORIGIN</td> <td style="text-align: center;">Anderson (Cass County)</td> <td style="text-align: center;">15</td> <td style="text-align: center;">7</td> </tr> <tr> <td style="text-align: center;">DESTINATION</td> <td style="text-align: center;">Baileyville</td> <td style="text-align: center;">4</td> <td style="text-align: center;">10</td> </tr> <tr> <td colspan="2" style="text-align: center;"><b>Difference:</b></td> <td style="text-align: center;">11</td> <td style="text-align: center;">3</td> </tr> </tbody> </table> <div style="border: 1px solid black; padding: 10px; margin: 10px auto; width: 80%; text-align: center;"> <p>Refer now to Grid Row 11 Column 3.  <b>Distance at intersection on grid is 175 miles.</b></p> <p>Use the same calculation process to add any other points to the same move.</p> </div> <p><b>NOTE:</b> When the origin and/or destination is not located within the city limits or boundaries of a point named herein, the city, town, or village named on the postal mailing address of the point served will be used as the origin and/or destination.</p>			ROW	COLUMN	ORIGIN	Anderson (Cass County)	15	7	DESTINATION	Baileyville	4	10	<b>Difference:</b>		11	3
		ROW	COLUMN														
ORIGIN	Anderson (Cass County)	15	7														
DESTINATION	Baileyville	4	10														
<b>Difference:</b>		11	3
